Smarter Interoperability for Workplace Safety, Security and Building Efficiency

Keeping up to date with the latest developments within your market can often be challenging and time consuming. Buildings, technology and processes evolve and often very quickly in this modern era.

Cortech Developments host a number of CPD seminars centred on the technology integration and smarter interoperability for workplace safety, security and building efficiency, which can count towards your CPD requirement. The seminars provide a targeted, relevant and educational forum for presenting the latest technological and operational advancements within the smart building arena.

You will be given an inspiring and thought provoking insight into the way infrastructures and buildings are managed with a view to safety, security, interoperability and sustainability.

Learning and Benefits

Technology

The latest advances in smart building and associated technology.

Integration

Smarter integration and system interoperability benefits.

Safety

How to reduce risk for workplace safety, security and building efficiency.

Investment

How the intelligent use of technology can improve return on investment.

Sustainability

Discover new ways to improve sustainability and reduce energy consumption.

When and Where

The CPD seminars are based around your team's needs and schedules. Cortech offer to host the seminar at our office via video conferencing and up to five members of your team can view the session online from the comfort of their own office or workstation.

Please note that each seminar attendee will earn 1 CPD point and be presented with a certificate of attendance.

If you are interested in organising a CPD seminar for your team, please contact Mark Thomas for more details on 01925 750600 or email shaun@cortech.co.uk
